

U. H. Pamuditha Neelanga

UI/UX Designer Intern

+94 71 302 3170 | pamudithaneelanga@gmail.com | linkedin.com/in/pamuditha-neelanga-23a2a4380

Portfolio Snapshot: 2 Mobile App Projects | 10+ UI Screens | 5+ Core App Flows | 6+ App Features | 10 Usability Testers

Professional Summary

UI/UX Designer with experience creating mobile app flows, wireframes, interactive mockups, high-fidelity interface screens, and informal usability tests for academic team projects. Skilled in Figma, user research, user personas, responsive interface design, and Kotlin-based Android app exposure. Focused on building simple, accessible, and user-centered digital experiences for internship-level product teams.

Skills

Tools:	Figma, Android Studio
Research & Analysis:	User Research, User Personas, User Flow Mapping, Requirement Analysis, Usability Testing
UI/UX Design:	Responsive Design, User Interface Design, Wireframing, Prototyping, Mobile App Design
Technical Exposure:	Kotlin, Android Application Development

Experience

UI/UX Design Project Experience	<i>Academic / Team Projects</i>
- Delivered 2 end-to-end mobile app projects, covering user research, 2 user personas, wireframes, clickable mockups, and high-fidelity screens. - Collaborated with teammates across 3 design stages - research, prototyping, and interface delivery - to improve screen flow and visual consistency. - Created user-centered interfaces for 5+ core app flows, improving navigation clarity, usability, and overall product experience. - Translated research findings into 2 user personas and practical screen-flow decisions for coffee ordering and finance tracking concepts. - Refined prototypes across 2 team review cycles and 10 usability-test responses, improving layout consistency, interaction flow, and mobile usability.	

Projects

The Coffee Shop App	<i>Figma September 2025 - October 2025</i>
- Developed a complete 5-step coffee ordering flow covering login, product browsing, drink customization, payment, and order success screens. - Produced 10+ mobile UI screens and reusable components with coffee-inspired visuals, clear hierarchy, and simple navigation. - Conducted informal usability testing with 5 users and refined 3 screens to improve drink customization clarity, navigation, and checkout flow. - Built wireframes and polished Figma screens to support a smooth ordering experience from product selection to successful checkout.	
Personal Finance Tracker App	<i>Kotlin, Android Studio February 2026 - March 2026</i>
- Built a Kotlin-based finance tracker with 4 core modules for income, expenses, budgets, and transaction management. - Developed a dashboard with 4 financial insights, including balance summaries, category spending charts, income trends, and budget progress. - Tested the prototype with 5 users and improved 3 flows - dashboard review, transaction entry, and budget tracking - based on feedback. - Implemented 6+ features including transactions, passcode security, currency settings, backup/restore, dark mode, and budget alerts.	

Design Process

- Practiced converting user requirements into 3+ deliverables: user flows, wireframes, and clickable product mockups for mobile-first ideas.
- Focused on usability-friendly layouts with readable hierarchy, consistent spacing, simple navigation, and clear call-to-action placement.
- Presented design decisions during team discussions and incorporated feedback to improve screen clarity and interaction consistency.

Education

BSc (Hons) in Information Technology Specializing in Information Technology Sri Lanka Institute of Information Technology, SLIIT	<i>May 2023 - June 2027</i>
